

Single-UAV autonomy end maps - best representative (seed 1061)

Local deterministic simulator | fixed shared testbed | development seeds only

Best development seed: 1061

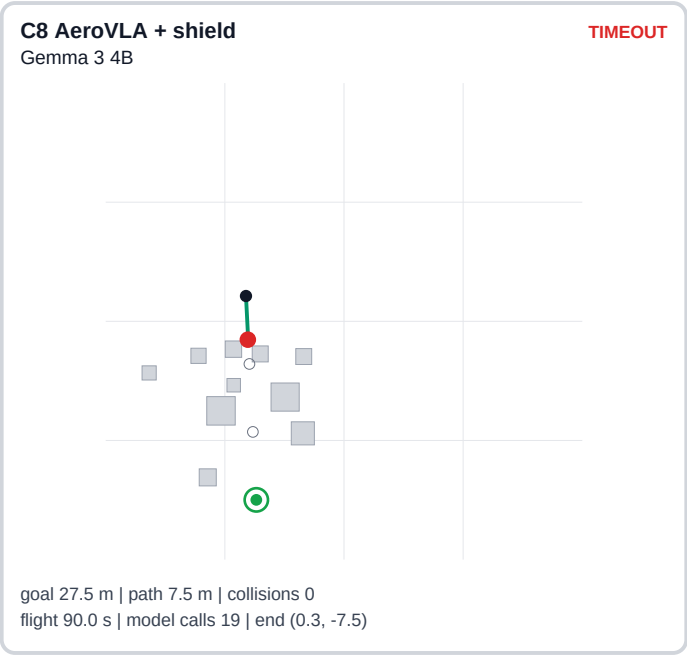

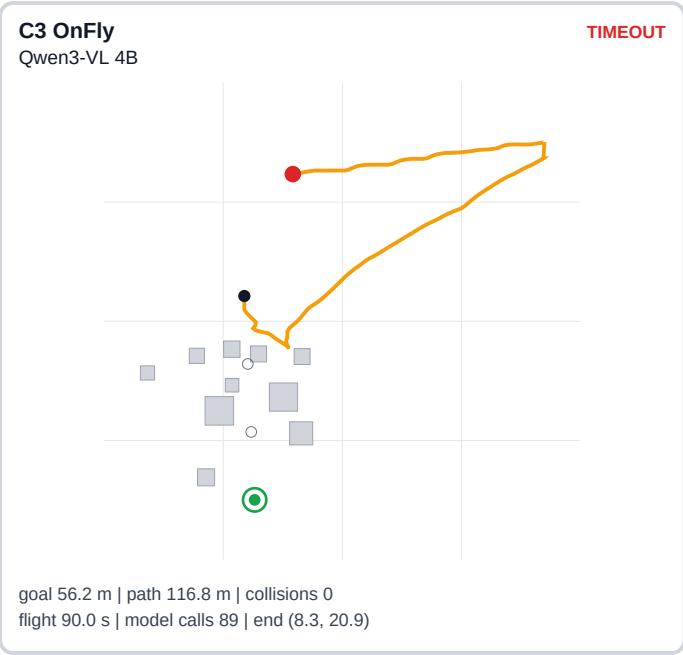

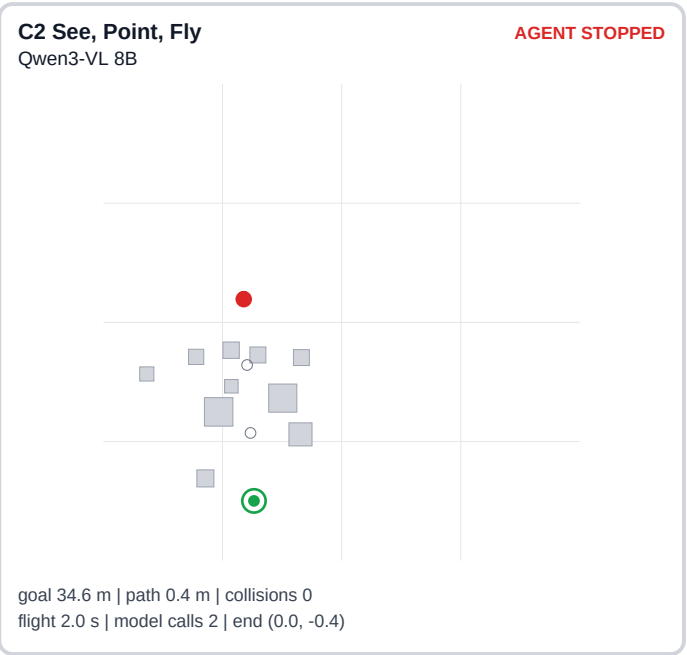

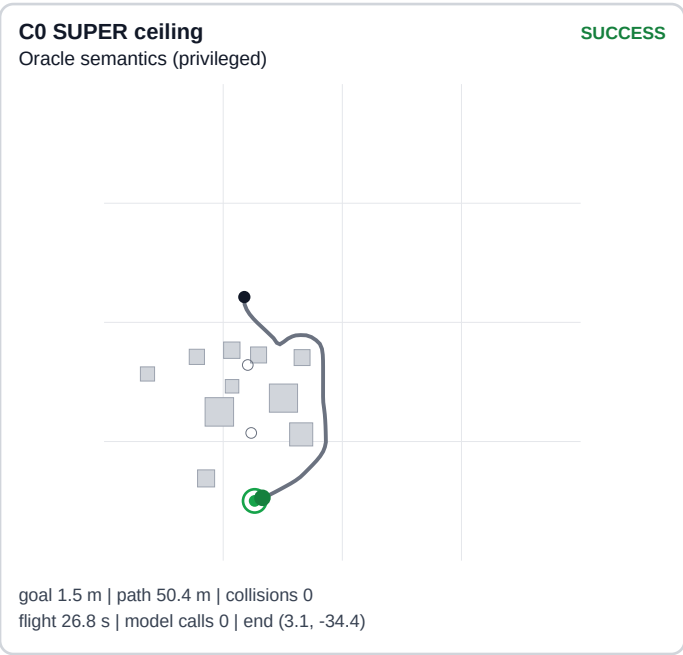

Selection across four non-oracle ports:
1/4 successes, 0 collisions,
mean endpoint distance 21.0 m.

C6 PMR: BLOCKED - trained CVI checkpoint absent.
The scripted C6 structural sentinel is excluded.

Paths: logged onboard pose at controller ticks.
Scene and verdict: deterministic simulator logs.
Same scene, controller, success rule, and channels.

Single-UAV autonomy end maps - median representative (seed 1064)

Local deterministic simulator | fixed shared testbed | development seeds only

Median development seed: 1064

Selection across four non-oracle ports:
1/4 successes, 0 collisions,
mean endpoint distance 29.7 m.

C6 PMR: BLOCKED - trained CVI checkpoint absent.
The scripted C6 structural sentinel is excluded.

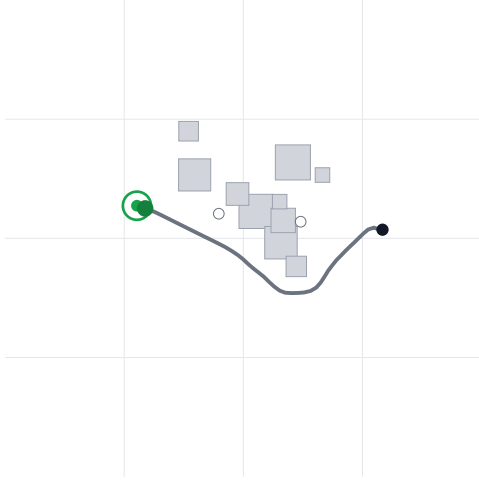

Paths: logged onboard pose at controller ticks.
Scene and verdict: deterministic simulator logs.
Same scene, controller, success rule, and channels.

Single-UAV autonomy end maps - worst representative (seed 1060)

Local deterministic simulator | fixed shared testbed | development seeds only

C0 SUPER ceiling
Oracle semantics (privileged)

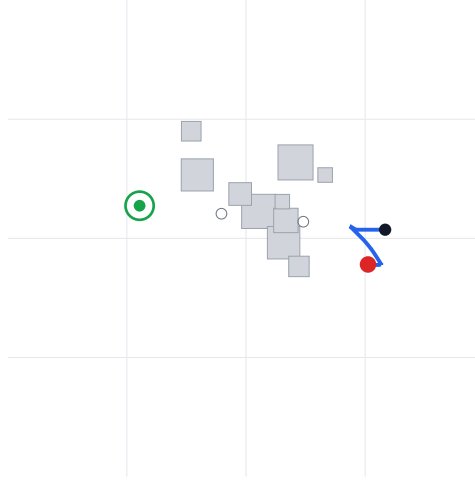

SUCCESS

goal 1.3 m | path 41.3 m | collisions 0
flight 21.2 s | model calls 0 | end (-33.7, 3.0)

C1 AerialClaw
GPT-OSS 20B

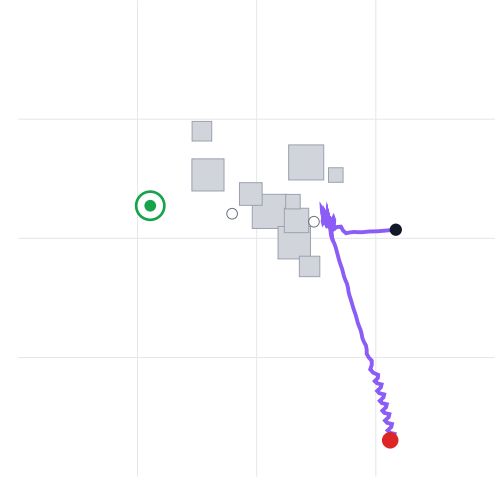

TIMEOUT

goal 35.8 m | path 22.9 m | collisions 0
flight 90.0 s | model calls 7 | end (-2.4, -4.9)

C2 See, Point, Fly
Qwen3-VL 8B

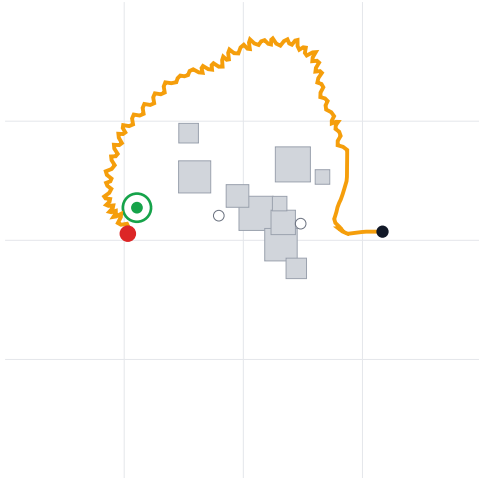

TIMEOUT

goal 47.6 m | path 114.6 m | collisions 0
flight 90.0 s | model calls 89 | end (-0.8, -29.9)

C3 OnFly
Qwen3-VL 4B

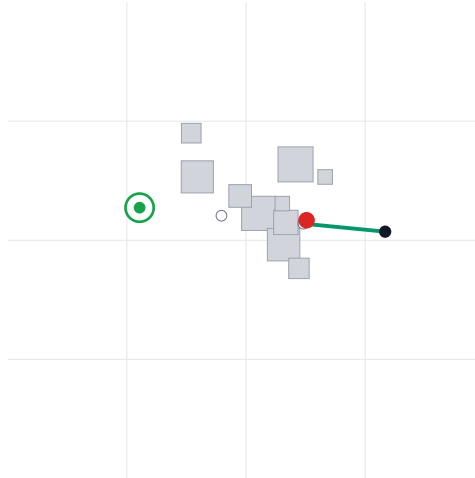

TIMEOUT

goal 4.1 m | path 120.7 m | collisions 0
flight 90.0 s | model calls 89 | end (-36.1, -0.3)

C8 AeroVLA + shield
Gemma 3 4B

TIMEOUT

goal 23.8 m | path 11.5 m | collisions 0
flight 90.0 s | model calls 19 | end (-11.1, 1.6)

Worst development seed: 1060

Selection across four non-oracle ports:
0/4 successes, 0 collisions,
mean endpoint distance 27.8 m.

C6 PMR: BLOCKED - trained CVI checkpoint absent.
The scripted C6 structural sentinel is excluded.

Paths: logged onboard pose at controller ticks.
Scene and verdict: deterministic simulator logs.
Same scene, controller, success rule, and channels.
