

Single-model UAV architecture end maps - best representative (seed 1062)

Qwen3-VL 4B for all non-oracle architectures | fixed shared testbed | development seeds only

C0 SUPER ceiling

Oracle semantics (privileged)

SUCCESS

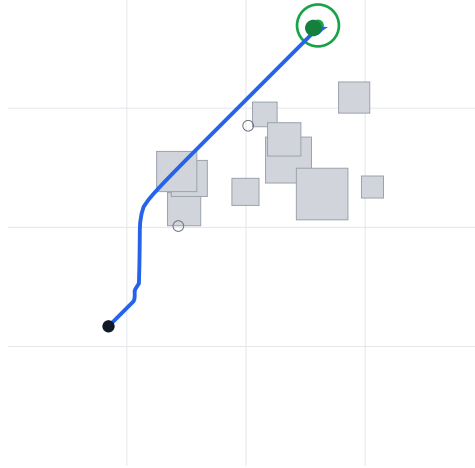

goal 1.4 m | path 38.6 m | collisions 0
flight 19.2 s | model calls 0 | end (18.7, 28.2)

C1 AerialClaw

Qwen3-VL 4B

SUCCESS

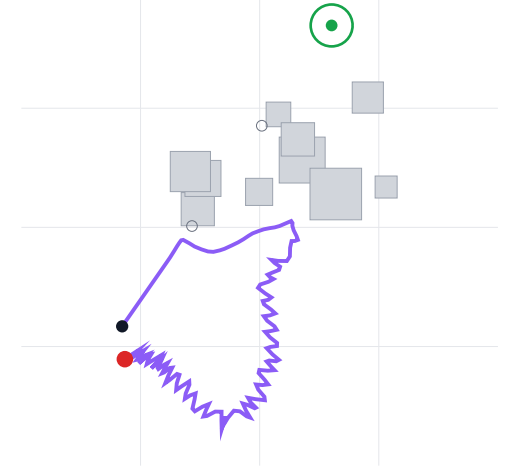

goal 0.6 m | path 55.9 m | collisions 0
flight 60.6 s | model calls 8 | end (19.6, 28.5)

C2 See, Point, Fly

Qwen3-VL 4B

TIMEOUT

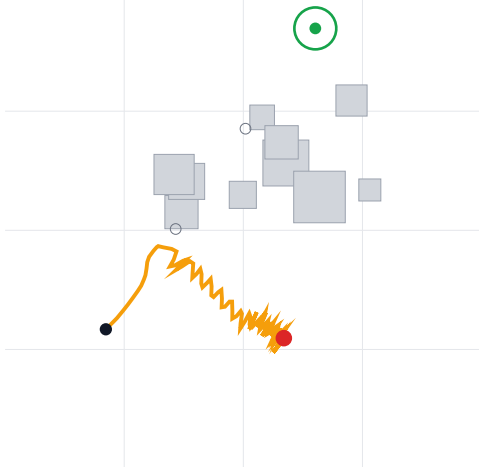

goal 37.5 m | path 108.4 m | collisions 0
flight 90.0 s | model calls 74 | end (0.3, -3.1)

C3 OnFly

Qwen3-VL 4B

TIMEOUT

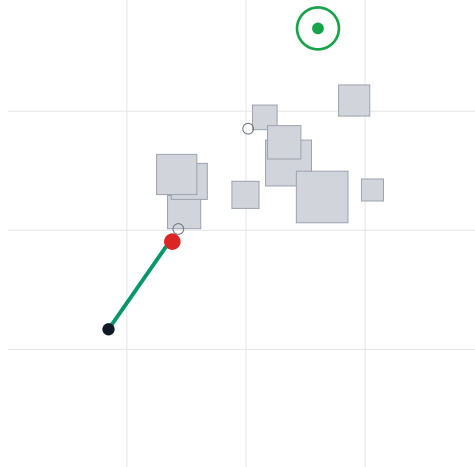

goal 29.8 m | path 109.3 m | collisions 0
flight 90.0 s | model calls 74 | end (17.0, -0.8)

C8 AeroVLA + shield

Qwen3-VL 4B

TIMEOUT

goal 24.7 m | path 10.4 m | collisions 0
flight 90.0 s | model calls 36 | end (6.1, 8.4)

Best development seed: 1062

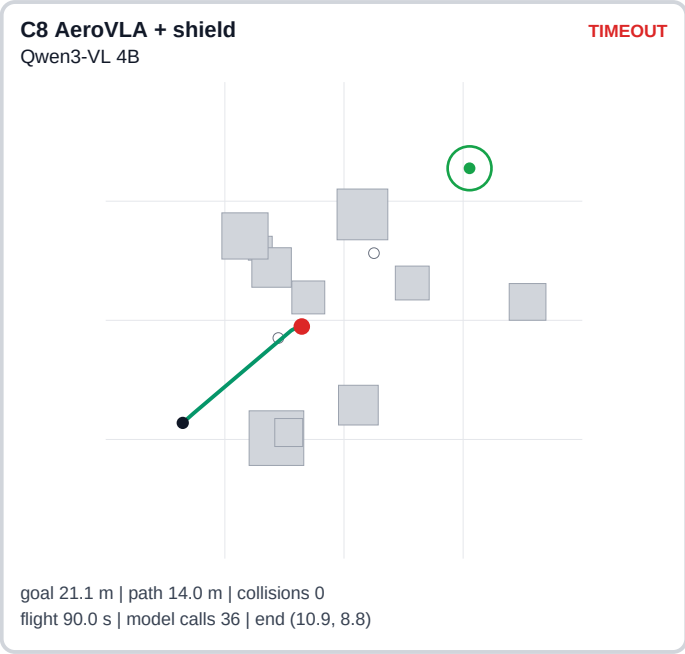

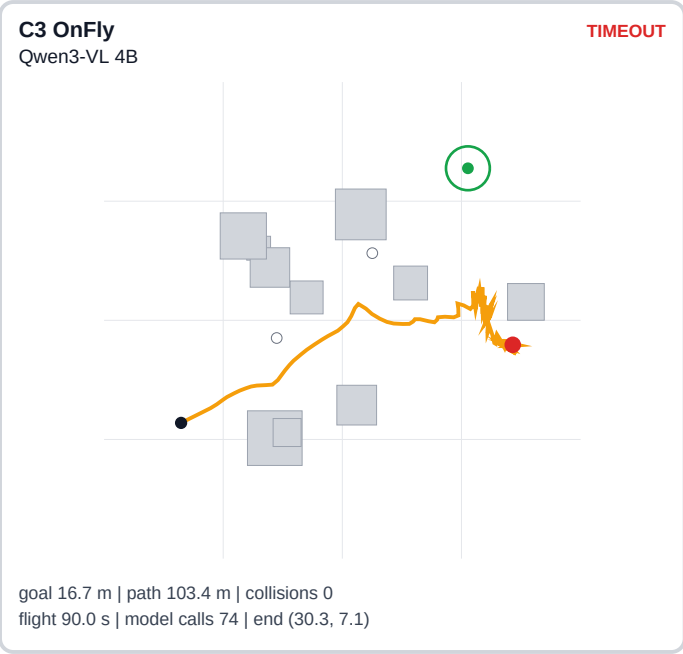

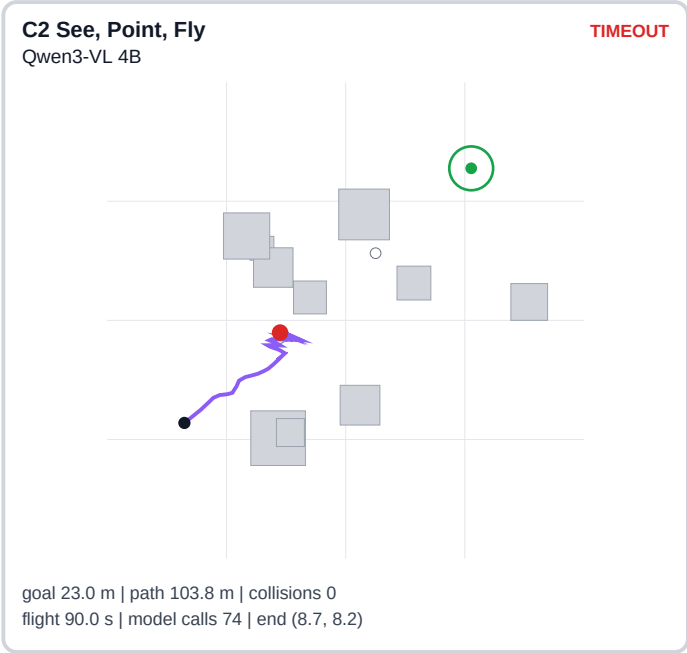

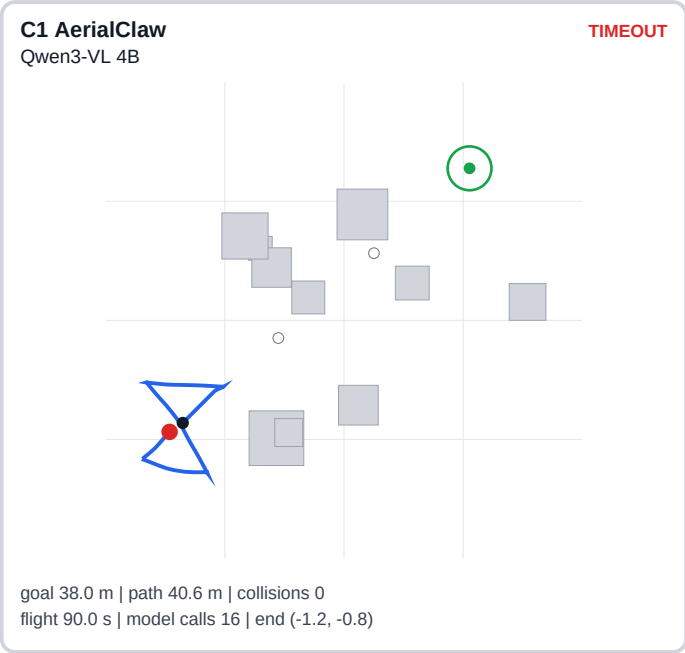

Selection across four non-oracle ports:
1/4 successes, 0 collisions,
mean endpoint distance 23.1 m.

C6 PMR: BLOCKED - trained CVI checkpoint absent.
The scripted C6 structural sentinel is excluded.

Paths: logged onboard pose at controller ticks.
Scene and verdict: deterministic simulator logs.
Same model, scene, controller, success rule, and channels.

Single-model UAV architecture end maps - median representative (seed 1061)

Qwen3-VL 4B for all non-oracle architectures | fixed shared testbed | development seeds only

Median development seed: 1061

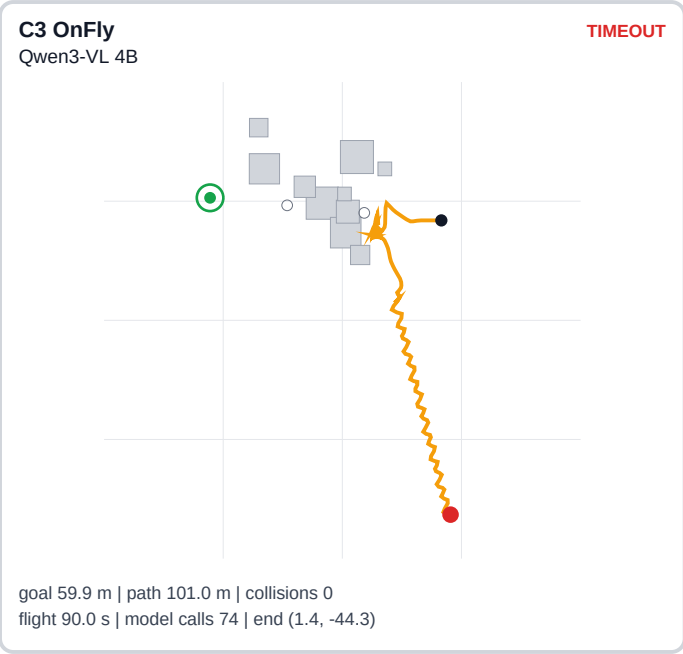

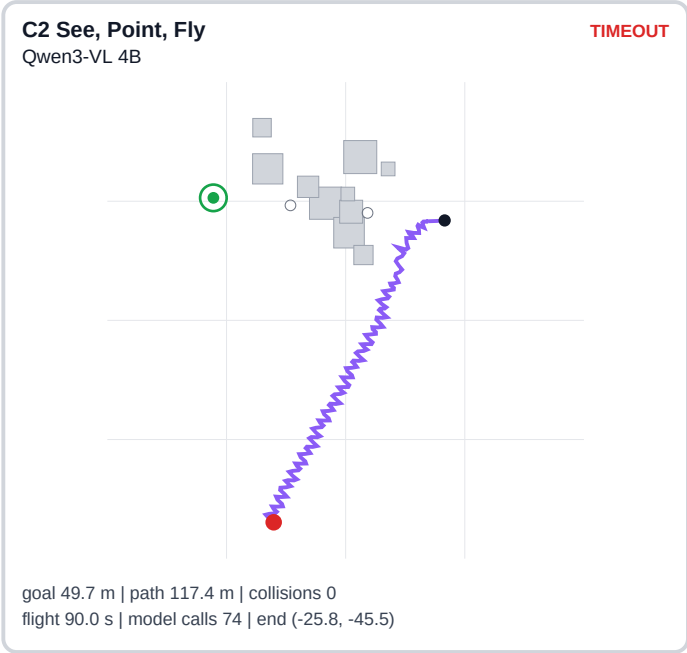

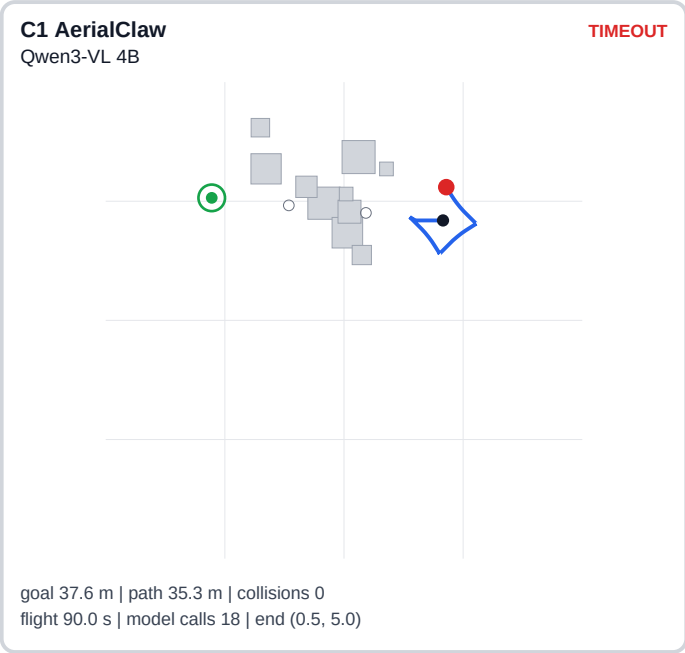

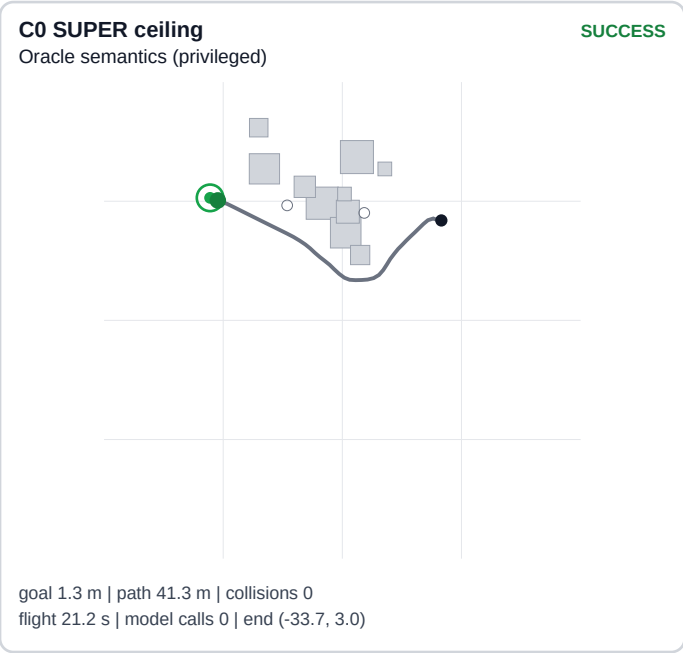

Selection across four non-oracle ports:
0/4 successes, 0 collisions,
mean endpoint distance 24.7 m.

C6 PMR: BLOCKED - trained CVI checkpoint absent.
The scripted C6 structural sentinel is excluded.

Paths: logged onboard pose at controller ticks.
Scene and verdict: deterministic simulator logs.
Same model, scene, controller, success rule, and channels.

Single-model UAV architecture end maps - worst representative (seed 1060)

Qwen3-VL 4B for all non-oracle architectures | fixed shared testbed | development seeds only

Worst development seed: 1060

Selection across four non-oracle ports:
0/4 successes, 0 collisions,
mean endpoint distance 42.7 m.

C6 PMR: BLOCKED - trained CVI checkpoint absent.
The scripted C6 structural sentinel is excluded.

Paths: logged onboard pose at controller ticks.
Scene and verdict: deterministic simulator logs.
Same model, scene, controller, success rule, and channels.
